DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 208-220 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The newly submitted claims do not recite a method for processing individual wafers and comprise limitations, which are not required by previously presented claims. The previously presented claims comprise limitations, which are not required by the newly submitted claims. Thus newly submitted claims and previously presented claims are patentably distinct.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 208-220 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16, 18, 19, 22-25, 45, 46, 52, 105-108 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Art Unit: 1746

This rejection made in the previous Office action is maintained for the reason of record. Newly submitted claims 214-218, having the same deficiency are included in the rejection.

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. The rejections made in the previous Office actions are maintained for the reasons of record.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
7. The rejections made in the previous Office actions are maintained for the reasons of record.

Response to Arguments

8. Applicant's arguments filed 12/27/04 have been fully considered but they are not persuasive. The applicants amended the claims to recite non-device side of the wafer. The applicants rely on this limitation in their argument. This is not persuasive because the structure of the apparatus of the prior art or modified apparatus of the prior art would be the same as the structure of the claimed apparatus. The apparatus of the prior art or modified apparatus of the prior art would be fully capable of holding the wafer as claimed. The instant claims are directed to the apparatus, not a method. In order to

Art Unit: 1746

show the difference between the prior art and the invention the claim should be limited by recitation of the structure.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
